Navigating Your Cumulative Experience at Iowa State University

ISU gave me a lot of educate from toes to head, i learned from many professor and they all were doing their best for their student be on top of everyone. Even when my writing isn't clear they're tried to best to understand what I was trying to say. If I write what I experienced at ISU wouldn't be enough to write about my experience from the beginning to the end. I will be focusing on this given questions "Design systems or processes? Recognize, formulate, and solve contemporary engineering problems? Work in a team-based environment? Communicate effectively? Seek knowledge beyond the classroom? Analyze a complex ethical situation as well as understand professional and ethical responsibilities?"

Design systems or processes,

Recognize

While working with couple of people I found how important it is; bring a lot of ideas and encourage one another, this happen only for the people who want to work hard and do their assignments beyond. There were a lot of things I had seen, there were a lot of time when I push my team members to do their assignments as soon as possible because some people only work right before the due date when the assignments were given a week before the due.

Communicate,
